EDUCATION

BACHELOR DIPLOMA IN INFORMATION TECHNOLOGY	Sep 2019 - Otc 2022
Passerelles numériques Vietnam (PNV)	

SUMMARY

I am eager to pursue a dynamic role within a forward-thinking company that offers a mobile position, where I can blend my existing 3 years of experience with my passion for continuous learning and self-improvement. I am enthusiastic about enhancing my IT skills and knowledge in a real-world working environment, contributing my expertise to the company's success, and further developing into a valuable asset. I am committed to dedicating my skills to contribute meaningfully to the growth and objectives of the organization.

SKILLS INFORMATION

- Skills:
- Flutter, React Native, Kotlin Compose, Javascript, Mysql**
- Google Map, Push Noti, Socket.IO, Firebase, Apps Link, Secure biometric (FaceId, TouchId), Ekyc via passport, ID Card**
- Others:
- Team working, Logical Thinking, Researching, Problem solving, It English**

WORK EXPERIENCE

MOBILE ENGINEER - Fulltime	Aug 2023 - Present
<i>Sparkminds Company - Flutter (4 Projects)</i>	
- Collaborated with the team to develop the core application and participated in developing the company’s outsourced projects, including social media, e-commerce, and service-based platforms. - Developed functionality to facilitate money transfers via linked bank accounts, ensuring seamless and secure transactions. - Integrated eKYC processes utilizing passport, ID card, and selfie verification to comply with regulatory standards and streamline user onboarding. - Integrated a real-time currency exchange chart using third-party provider NIUM to display up-to-date exchange rates, enhancing user financial decisions. - Implemented state management using GetX, Provider, and Bloc/Cubit base required of stackholder - Developed and deploying service app links using Next.js + Netlify. - Integrated Firebase for push notifications, socket.io implement - Managed internal builds and releasing applications on app stores (Google Play Store, Apple App Store). - Integrated apps transfer money with Thai Bank (Tmw, Kbanks, SCB,...)	
MOBILE ENGINEER - Parttime	May 2023 - Aug 2023
<i>Voyager Company - Flutter, Kotlin (2 Projects)</i>	
- Developed a cross-platform mobile app using Flutter to interface with IoT devices. - Integrated native Android (Kotlin) code into Flutter via platform channels to enable real-time video calling between the IoT device and mobile (iPhone/Android). - Developed an HR management application with data synchronization from server to local storage, enabling seamless functionality in offline (non-internet) environments. - Built dynamic real-time charts (occupancy detection) synced from IoT sensors, optimized with stream-based data updates using WebSocket. - Implemented NFC-based login authentication via chip-embedded cards. - Utilized GraphQL for efficient and structured device communication and data querying.	

GreenAgri Company - Flutter, Kotlin (2 Project)

- Designed and managed app state using GetX for lightweight UI interaction and Bloc/Cubit for modular business logic control.
- Integrated Firebase Cloud Messaging to support real-time push notifications, background handling, and platform-specific permission flows.
- Deployed applications to Google Play Store and Apple App Store, managing signing, CI/CD pipelines, and store submission processes.
- Worked closely with internal teams to develop, test, and optimize key features in a cross-platform IoT application.

Positive Thingking Company - Java, Javascript

- Participated in the Viator travel web project as a Full-stack Developer for 3 months, contributing to both frontend and backend features.
- Worked with modern web technologies including Redux, TypeScript (frontend), and Java (backend).
- Completed a 2-month programming internship, gaining foundational experience in software development.
- Followed the Agile Scrum methodology, attending daily standups, sprint planning, and regular reviews.

Exchange Learning Together - React native, Firebase, Javascript, Facebook sdk, Google Singin

- Integrated social login with Google and Facebook using Firebase Authentication.
- Developed core features: Q&A, commenting, chat with friends, email notifications, book purchasing, and user account management.
- Collaborated with team members to plan, design, and implement app functionality.
- Handled bug fixing, performance optimization, and app maintenance.

Atoma Company - Laravel. Vuejs, Flutter

- Completed a 2-month internship focused on building a Flutter mobile application with user authentication and CRUD operations.
- Designed and implemented a demo product to manage user accounts, including login, authentication, and user CRUD features.
- Studied and applied Vue.js to build a responsive admin dashboard for HR managers with full CRUD capabilities.
- Created RESTful APIs and database schema using the Laravel framework to support the frontend systems.

CORE COMPETENCIES

- Cross-platform mobile development with Flutter (Dart)
- State management: Provider, Bloc, GetX
- Firebase integration: Auth, Firestore, Cloud Functions, Messaging, Remote Config
- RESTful API integration & JSON serialization
- Push Notifications & Deep Linking
- Authentication (Email/Password, Biometric, Google/Facebook Sign-In, Apple)
- Camera & image processing (e.g., crop, compress, face detection)
- Socket.IO & real-time chat implementation
- Testing: Unit test, Widget test
- Build & release: CI/CD, Google Play, App Store
- Agile/Scrum teamwork, task estimation, team collaboration tools (Jira, Trello)
