SUMMARY

I am eager to pursue a dynamic role within a forward-thinking company that offers a mobile position, where I can blend my existing 3 years of experiences with my passion for continuous learning and self-improvement. I am enthusiastic about enhancing my IT skills and knowledge in a real-world working environment, contributing my expertise to the company's success, and further developing into a valuable asset. I am committed to dedicating my skills to contribute meaningfully to the growth and objectives of the organization.

SKILLS INFORMATION

Skills:

Flutter, React Native, Kotlin Compose, Javascript, Mysql

Google Map, Push Notification, Socket, Firebase, Apps Link, Secure Biometric (FaceId, TouchId), Ekyc via Passport, ID Card, FaceID

Others:

Team Working, Logical Thinking, Researching, Problem Solving, It English

WORK EXPERIENCE

MOBILE ENGINEER - Fulltime

Tan Binh District, HCM

Sparkminds Company - Flutter, React Native

Aug 2023 - Present

- Collaborated with the team to develop the core application and participated in developing the company’s outsourced projects, including social media, e-commerce, crypto, dating and service-based platforms.
- Developed functionalities to facilitate money transfers via linked bank accounts, ensuring seamless and secure transactions.
- Integrated eKYC processes utilizing passport, ID card, and selfie verification to comply with regulatory standards and streamline user onboarding.
- Integrate real-time exchange rate charts using third-party provider NIUM to display the latest exchange rates and enhance users' financial decisions.
- Implemented state management using GetX, Provider, and Bloc/Cubit, Redux base requirements of stackholder.
- Developed and deployed service app links using Next.js + Netlify.
- Integrated Firebase for push notifications, socket.io.
- Managed internal builds and release applications on app stores (Google Play Store, Apple App Store).
- Integrated apps transfer money with Thai Bank (Tmw, Kbanks, SCB,...)

MOBILE ENGINEER - Parttime

District 12, HCM

Voyager Company - Flutter, Kotlin (2 Projects)

May 2023 - Aug 2023

- Developed a cross-platform mobile app using Flutter to interface with IoT devices.
- Integrated native Android (Kotlin) code into Flutter via platform channels to enable real-time video calling between the IoT device and mobile (iPhone/Android).
- Developed application with data synchronization from server to local storage, enabling seamless functionality in offline (non-internet) environments.
- Built dynamic real-time charts (occupancy detection) synced from IoT sensors, optimized with stream-based data updates using WebSocket.
- Implemented NFC-based login authentication via chip-embedded cards.
- Utilized GraphQL for efficient and structured device communication and data querying.

MOBILE ENGINEER - Fulltime

District 2, HCM

GreenAgri Company - Flutter, Kotlin (3 Project)

Aug 2022 - May 2023

- Designed and managed app state using GetX for lightweight UI interaction and Bloc/Cubit for modular business logic control.
- Integrated push notifications, background handling, and platform-specific permission flows, using sqlite integrate functionality in offline
- Deployed applications to Google Play Store and Apple App Store, managing signing, CI/CD pipelines, and store submission processes.
- Worked closely with internal teams to develop, test, and optimize key features in a cross-platform IoT application.
- Integrated SDKs and native Android/iOS modules into Flutter to handle background functions.

FullStack Develop - Internship

Tan Binh District, HCM

Positive Thingking Company - Java, Javascript

Apr 2022 - Aug 2022

- Participated in the Viator travel real web project as a Full-stack Developer for 3 months, contributed to fullstack features.
- Worked with modern web technologies including Redux, TS-JS, and Java Springboot
- Completed a 5-months programming internship, gaining foundational experience in software development.
- Followed the Agile Scrum methodology, attending daily standups, sprint planning, and regular reviews.

Graduation Project	Son Tra, DN
<i>Exchange Learning Together - React native, Firebase, Javascript, Facebook sdk, Google Singin , Azure</i>	Jan 2022 - Mar 2022
- Integrated social login with Google and Facebook using Firebase Authentication. - Developed core features: Q&A, commenting, chat with friends, email notifications, book purchasing, and user account management. - Collaborated with team members to plan, design, and implement app functionality. - Handled bug fixing, performance optimization, and app maintenance.	

Developer - Internship second years	HaiChau, DN
<i>Atoma Company - Laravel. Vuejs, Flutter</i>	July 2021 - Sep 2021
- Completed a 2-months internship focused on building a Flutter mobile application with user authentication and CRUD operations. - Designed and implemented a demo product to manage user accounts, including login, authentication, and user. - Studied and applied Vue.js to build a responsive admin dashboard for HR managers with full CRUD capabilities. - Received feedback and review of mentor each PR	

EDUCATION

BACHELOR DIPLOMA IN INFORMATION TECHNOLOGY	Sep 2019 - Otc 2022
Passerelles numériques Vietnam (PNV)	GPA: 3.46/5

CORE COMPETENCIES

- Cross-platform mobile development with Flutter (Dart), React Native (JS-TS).
- State management (Provider, Bloc, GetX, Redux).
- Firebase integration (Auth, Firestore, Cloud Functions, Messaging, Remote Config).
- RestFul API integration & JSON serialization.
- Push Notifications & Deep Linking & Socket.
- Local Authentications (Biometric, Google/Facebook Sign-In, Apple).
- Camera & image processing (e.g., crop, compress, face detection).
- Config build & release (CI/CD, Google Play, App Store, Fastlane).
- Agile/Scrum teamwork, task estimation, team collaboration tools (Jira, Trello).
