ABOUT ME

Mobile Engineer with 4+ years of experience building production-ready applications across Mobile, Web, and Backend systems. Strong expertise in Flutter and React Native, with hands-on experience in Kotlin, Swift, Java Spring Boot, and modern web technologies. Focused on scalable architecture, performance optimization, and end-to-end product delivery.

EDUCATION

BACHELOR DIPLOMA IN INFORMATION TECHNOLOGY

Sep 2019 - Oct 2022

Passerelles numériques Vietnam (PNV)

GPA: 3.46/4

SKILLS INFORMATION

Mobile: Flutter, React Native, Kotlin, Swift
Mobile Architecture: Clean Architecture, REST API, GraphQL, WebSocket/Socket.IO, Offline-first, Deep Linking, Push Notifications, Platform Channels
Backend & Web: Java Spring Boot, Java, TypeScript, JavaScript, React.js, Next.js
Database & Infrastructure: PostgreSQL, MySQL, Redis, Kafka, Docker
Delivery & Collaboration: Git, CI/CD, Agile/Scrum, Jira

WORK EXPERIENCES

MOBILE ENGINEER

SparkMinds Company - Flutter, React Native, Kotlin, Swift, Java Spring Boot

Aug 2023 - Present

- Leveraged AI-assisted tools to accelerate development, debugging, technical research, and repetitive engineering tasks across projects.
- Reduced third-party dependency and operational costs by 5% by implementing an internal deep-linking solution.
- Delivered 4+ mobile products end-to-end, from requirements analysis and development to production launch, maintenance, and continuous improvement.
- Managed and prioritized multiple features and development tasks in parallel, coordinating implementation, debugging, testing, and releases across Mobile, Web, and Backend.
- Built and maintained mobile features across Android and iOS, covering UI/UX, state management, API integration, local storage, authentication, deep linking, push notifications, and real-time communication.
- Diagnosed and resolved complex issues involving performance, networking, lifecycle, memory, native integrations, build configurations, APIs, and production crashes.
- Mentored team members through technical guidance and code reviews, promoting coding best practices and maintainable solutions.

MOBILE ENGINEER

Voyager Company - Flutter, Kotlin

May 2023 - Aug 2023

- Developed a cross-platform mobile application with Flutter for seamless interaction and control of IoT devices.
- Integrated native Android (Kotlin) capabilities through Flutter Platform Channels to enable real-time video communication between mobile devices and IoT hardware.
- Implemented offline-first data synchronization between server and local storage, ensuring reliable application functionality without an active internet connection.
- Built real-time occupancy monitoring and dynamic data visualization using IoT sensor data, Socket.IO, and stream-based updates, enabling users to monitor device status and occupancy in real time.
- Implemented NFC-based authentication using chip-enabled cards for secure and convenient user access.
- Integrated GraphQL for efficient device communication, data querying, and real-time application workflows.
- Optimized mobile-to-device communication and data handling to ensure responsive and reliable operation across varying network conditions.

MOBILE ENGINEER

GreenAgri Company - Flutter, Kotlin

Aug 2022 - May 2023

- Designed and managed app state using GetX for lightweight UI interaction and Bloc/Cubit for modular business logic control.
- Integrated push notifications, background handling, and platform-specific permission flows. Implemented offline data storage and synchronization using SQLite.
- Deployed applications to Google Play Store and Apple App Store, managing signing, CI/CD pipelines, and store submission processes.
- Collaborated with third-party vendors to research, develop, and integrate key hardware features, including receipt printing and audio notification systems for sound box devices, into our cross-platform IoT application.
- Planned and executed application version upgrades, ensuring smooth deployments with minimal user disruption.

FULL STACK DEVELOPER

CBTW Vietnam - Android (Kotlin), Java, Javascript, TypeScript

Apr 2022 - Aug 2022

- Completed a 2-month programming internship and subsequently continued as a Full-stack Developer, contributing to real-world client projects.
- Contributed to the Viator Travel Web project, developing production features using TypeScript, Redux, and Java Spring Boot.
- Worked within an Agile/Scrum team, participating in daily stand-ups, sprint planning, code reviews, and regular sprint reviews.
- Gained hands-on experience in real-world product development, understanding the end-to-end software delivery process from requirements and development to testing, deployment, and production maintenance.

FULL STACK INTERN

Atoma Company - Laravel. Vuejs, Flutter

July 2021 - Sep 2021

- Secured and completed a 2-month remote internship independently during my second year of university, gaining hands-on experience in Flutter mobile dev
- Developed mobile features with Flutter and built a responsive Vue.js admin dashboard with authentication and CRUD functionality.
- Successfully completed all assigned tasks and received positive feedback through mentor code reviews.
