ABOUT ME

I am eager to pursue a dynamic role within a forward-thinking company in a mobile development position, where I can leverage my more than three years of experience along with my passion for continuous learning and self-improvement. I aim to apply my academic knowledge to real-world projects and am committed to contributing effectively to the organization’s goals. My long-term objective is to grow into a proficient Full-Stack Mobile Developer through challenging work and mentorship.

SKILLS INFORMATION

Languages: Dart, Kotlin, Javascript

Frameworks: Flutter, React Native, Kotlin Compose

RDBMS: MySql, Sqlite

CI/CDs: Github Action, FastLane, Gitlab

Methodologies: Agile, Jira, Confluence tools

WORK EXPERIENCES

MOBILE ENGINEER

SparkMinds Company - Flutter, React Native, KotLin, Swift Aug 2023 - Now

- Collaborated with the team to build the core application and contributed to outsourced projects across multiple domains, including Social Media, E-commerce, Crypto, Dating, and service-based platforms.
- Integrated real-time exchange rate charts using the third-party provider NIUM, implemented eKYC processes with passport, ID card, and selfie verification, and developed features such as push notifications and Socket.IO communication.
- Implemented state management solutions using GetX, Provider, Bloc/Cubit, and Redux based on client requirements.
- Managed internal builds and handled application releases on Google Play Store and Apple App Store.
- Applied common design patterns (Singleton, Dependency Injection, Adapter) to enhance code reusability, scalability, and testability, ensuring seamless and secure application performance.
- Researched and developed a proprietary deep linking service to remove reliance on third-party providers and eliminate recurring costs.

MOBILE ENGINEER

Voyager Company - Flutter, Kotlin May 2023 - Aug 2023

- Developed a cross-platform mobile app using Flutter to interface with IoT devices.
- Integrated native Android (Kotlin) code into Flutter via platform channels to enable real-time video calling between the IoT device and Mobile.
- Developed application with data synchronization from server to local storage, enabling seamless functionality in offline (non-internet) environments.
- Built dynamic real-time charts (occupancy detection) synced from IoT sensors, optimized with stream-based data updates using SocketIO.
- Implemented NFC-based login authentication via chip-embedded cards.
- Utilized GraphQL for efficient and structured device communication and data querying.

MOBILE ENGINEER

GreenAgri Company - Flutter, Kotlin Aug 2022 - May 2023

- Designed and managed app state using GetX for lightweight UI interaction and Bloc/Cubit for modular business logic control.
- Integrated push notifications, background handling, and platform-specific permission flows, using sqlite integrate functionality in offline
- Deployed applications to Google Play Store and Apple App Store, managing signing, CI/CD pipelines, and store submission processes.
- Collaborated with third-party vendors to research, develop, and integrate key hardware features, including receipt printing and audio notification systems for sound box devices, into our cross-platform IoT application.
- Orchestrated the planning and execution of application version upgrades, ensuring seamless deployment and zero downtime for users.

FULL STACK DEVELOPER

Positive Thingking Company - Java, Javascript Apr 2022 - Aug 2022

- Completed a 2-months programming internship, gaining foundational experience in software development.
- Participated in the Viator travel real web project as a Full-stack Developer for 3 months, contributed to features.
- Worked with modern web technologies including Redux, TypeScript and Java Spring Boot.
- Followed the Agile/Scrum methodologies, attended daily standups, sprint planning, and regular reviews.

FULL STACK INTERN

Atoma Company - Laravel. Vuejs, Flutter July 2021 - Sep 2021

- Completed a 2-months internship focused on building a Flutter mobile application with user authentication and CRUD operations.
- Designed and implemented a demo product to manage user accounts, including login, authentication, and user.
- Studied and applied Vue.js to build a responsive admin dashboard for HR managers with full CRUD capabilities.
- Received feedback and review of mentor each PR.

EDUCATION

BACHELOR DIPLOMA IN INFORMATION TECHNOLOGY	Sep 2019 - Otc 2022
Passerelles numériques Vietnam (PNV)	GPA: 3.46/4

CORE COMPETENCIES

- Cross-platform mobile development with Flutter (Dart), React Native (JS-TS).
- State management (Provider, Bloc, GetX, Redux).
- Firebase integration (Auth, Firestore, Cloud Functions, Messaging, Remote Config).
- RestFul API integration & JSON serialization.
- Push Notifications & Deep Linking & SocketIO.
- Authentications (Biometric, Google/Facebook Sign-In, Apple).
- Camera & image processing (e.g., crop, compress, face detection).
- Config build & release (CI/CD, Google Play, App Store, Fastlane).
- Agile/Scrum teamwork, task estimation, team collaboration tools (Jira, Trello).
